EDUCATION

SRM Institute of Science and Technology

B.Tech in Computer Science and Engineering | Graduation Year: 2028

Chennai, India (2024-2028)

CGPA: 9.18

DAV Public School, Bariatu

Ranchi, Jharkhand, India

EXPERIENCE

Backend Development Intern — Accemberg Technologies Pvt. Ltd.

June 2026 – July 2026

- Worked across multiple client projects handling backend architecture and deployment, including Firebase (Auth, Firestore) integration and hosting/deployment on Vercel.
- Implemented authentication flows and managed secure environment/credential handling across projects.
- Deployed and maintained production builds, coordinating with frontend and API teams to ship features end-to-end.

Intern — Jharkhand Education Project Council (JEPC)

June 2026 – July 2026

- Built RAG (Retrieval-Augmented Generation) pipelines to power an internal chatbot for querying domain-specific documents.
- Integrated NeMo Guardrails to enforce safe, on-topic, and policy-compliant chatbot responses.
- Improved response accuracy and reliability through prompt engineering and retrieval tuning.

PROJECTS

AI Interview Preparation Platform

React, FastAPI, Python, NLP

- Designed and developed backend APIs using FastAPI to process user data and generate personalized interview questions.
- Built automated data ingestion and processing pipelines for resume parsing and dynamic question generation.
- Implemented real-time evaluation and scoring system using structured data storage and retrieval.
- Integrated NLP models to analyze user responses and improve feedback accuracy.

TerraMind – Agri Intelligence Platform

Python, Django, Data Analysis

- Built an ETL pipeline to ingest and transform satellite NDVI datasets for crop health monitoring.
- Processed and analyzed agricultural datasets to generate irrigation and soil recommendations.
- Designed dashboards to visualize processed data and provide actionable insights.

Crypto Trading Bot (Simulated)

Python, REST APIs

- Built a real-time data ingestion pipeline fetching live cryptocurrency price data via external REST APIs.
- Engineered a continuous ETL pipeline for data transformation and decision-making (BUY/HOLD logic).
- Designed modular, scalable code architecture for future integration with real trading systems.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, Java, C++

Frameworks: Next.js, React, FastAPI, Django, Flask, Tailwind CSS

Tools & Platforms: Git, GitHub, Firebase, Vercel, SQLite, VS Code

Data & AI: ETL/ELT Pipelines, REST APIs, RAG, NeMo Guardrails, DBMS

RELEVANT COURSEWORK

Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Big Data Technologies, Computer Networks, Operating Systems

CERTIFICATIONS & ACHIEVEMENTS

- NPTel – Java Programming & OOP | Participant – Codeathon Techformers 1.0
- SRM Hackathon 10.0 – Ranked 4th out of 200+ teams | Solved 100+ Questions on LeetCode
- HackerRank – 2 Star Badge
